THE NEW iQ700 OVEN RANGE

# The kitchen has always been about connecting

Ever since we gathered around a fire, cooking has been about connecting. Today, even more so. The kitchen has opened up: architecturally, culturally and technologically. It has become the social hub of life. That's why the Siemens kitchen is all about connecting. Connecting an oven so you don't have to stand by to see what's going on in it. Connecting a fridge so you can check what's missing while shopping. Connecting to the endless possibilities of the smart home so that you can connect to the important things in life.

# Let the new iQ700 oven keep you close to your friends.

Discover the smart features of the new iQ700 oven. And bring your cooking skills to the next level. Brown your food according to your taste. Check the status of your dish on your phone. All while enjoying your evening with friends. Your intelligent oven checks on your food for your perfect result.

## Well prepared. Well connected. Well done.

The integrated camera of your new iQ700 oven and the Home Connect App enable you to check your food from wherever you are and give you the freedom of controlling the oven settings without being nearby. So while your oven is preparing your food you can easily keep an eye on it.

## We keep a camera on your food.

You don't have to stand in front of the oven to stare at your food anymore. Because from now on you can keep looking at your evenly browning dish on your smartphone. Or even create mouth-watering time lapse videos and send them to your friends. The Home Connect App lets you know when your dish is ready and your oven switches off automatically. So you can relaxedly take your meal out when you are ready, too.

**On a scale from one to five: Choose your favourite level of crunch.**

The new iQ700 oven comes with Individual Browning and offers five different browning levels you can choose from: While your food is baking the integrated camera keeps checking on your chosen level. When your dish is ready, the oven turns off automatically and sends you a notification that your preferred browning level is reached. Always get your favourite food the way you love it.

# Prepare what you prefer.

**Prepare what you prefer.**

**From soft to crunchy:**

Whatever is perfect for you will be perfect for the new iQ700 oven. With its Individual Browning function and the integrated camera you become chef de cuisine in your intelligent kitchen. Serve and enjoy your favourite food according to your personal taste.

For more detailed information about the all new iQ700 oven models turn to page **10**. And to get an overview about the whole intelligent iQ700 family and the possibilities of combining them, please, read further on pages **18** to **23**.

# You want the perfect result? We hear you.

It listens. It gives recommendations. It answers your questions by serving the dish you have asked for\*. Once you have connected the new iQ700 oven with your Home Connect App and your voice assistant\*\* everything becomes easier: Whenever you are not sure how your dish has to be baked, your Oven Assistant will help you to choose the right programme. You simply tell your voice assistant which dish you want to prepare.

Or if you do it via Home Connect App the Oven Assistant suggests a selection of settings and programmes and then switches to your selection – one of many time saving shortcuts.

You can also ask your voice assistant to keep your dish warm when you are not ready to eat yet or if your friends are extremely hungry, just speed up the baking time. Simply guide the new iQ700 oven with Voice Control. And your oven will guide you.

# You want it simply delicious? We keep control.

While you are handling your oven via Voice Control, smartphone, tablet or touch display, the new iQ700 oven handles your dish: cookControl Pro makes baking and roasting become more satisfying than ever before. The only thing you need to do is select your dish and your preferences from various suggestions. So whether it is roast beef, lasagne or a birthday cake – cookControl Pro automatically does what's necessary to prepare your dish the way you like it. Beyond that the integrated bakingSensor Plus measures the moisture level inside the oven to make

your ciabatta as crunchy or your banana bread as juicy as it should be. And if you are looking for the perfect roast the roastingSensor Plus is in charge: No matter it's if meat, fish or poultry you simply put a thermometer inside your dish and relax. As three different measuring points are continuously checking the roasting level, you can always expect the highest accuracy for delicious results. After all, your Home Connect app and your oven keep you up to date about the estimated baking or roasting time and the new iQ700 oven switches off automatically when your dish is ready.

# Not even the basics are basic.

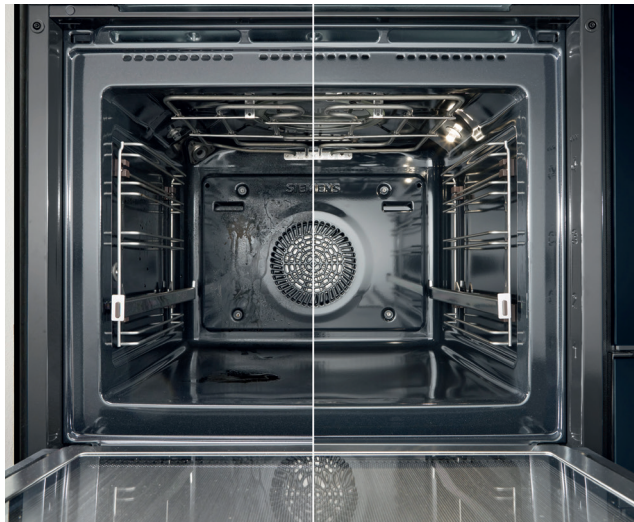

Besides all those smart features and functions, the new iQ700 oven excels in every other possible sense as well. Even in the basic tasks for every oven. Starting with the rails: varioClip Rails Plus offer you a flexible cooking experience. The easy mounting-system allows you to apply the telescopic rails at any height – whatever is perfect for your chosen dish, even on grill level. The full-extension rail system makes it easier for you to load and unload your food safely.

» *Everything you expect from an oven and everything you did not even think of.*

**activeClean: Connect to all-new. Again and again.**

After all the baking and cooking, activeClean takes care that your oven gets back into its brightly polished condition by using pyrolysis technology: high heat turns dirt and stains into ashes. All it takes for you is a touch of your finger and a sponge to clean it up. Thanks to activeClean you never need to scrub your oven again.

**Choose the model that fits you and your needs**

The new iQ700 oven comes in different variants and each of them is equipped with different smart features or elementary functions. All oven models are equally beautiful in design although not all of the features are combinable with each other or with the oven size you are interested in. So, first of all you get to choose between the standard measure of the new iQ700 oven (60 x 60 cm) which is represented in this brochure or the compact oven with microwave function (60 x 45 cm). Then it depends what you actually expect from your oven: The Individual Browning function with integrated camera and automatic switch-off, the microwave, the steam function or the self-cleaning function? Find out what's possible and which features work with your preferred oven model on the respective page in the appendix.

**Everything becomes brighter.****Thanks to dualLED**

Whatever is happening inside your oven will be perfectly illuminated by two modern and energy-efficient LED lights, the dualLED.

*» Connect to satisfying results,  
whatever is on the menu.*

**Everything becomes tender.****Thanks to fullSteam Plus.**

The steam function of the new iQ700 oven is not only a healthier way of cooking, it is also faster: The perfectly balanced combination of steam and heat at 120°C finishes your dish about 20% faster than the standard degree of 100°C does. At the same time it preserves your vegetables' fresh colours and beneficial elements like vitamins are retained. Even firm vegetables like potatoes and carrots become perfectly tender making fullSteam Plus one of the most convenient ways to prepare a delicious and healthy meal.

Inspired by its intelligence, our designers have complemented the stunning features of the new iQ700 oven with an equally stunning design: Elegance combined with performance unite to make your kitchen look as smart as it is.

# Designed to look as smart as it is.

## Beauty, built into your everyday life.

The new iQ700 oven is not only smart. It is an incomparable design piece. All its edges, curves and measurements are perfectly aligned to make your everyday life easier and more beautiful at once. The new iQ700 oven is built for many reasons: to flatter your taste, to please your eyes and to stir all your senses.

The passion for detail becomes visible on the outside.

Connect to the endless possibilities of combining all the beautifully designed appliances of the iQ700 oven range on page 18 and following.

## Intelligently connected. Beautifully designed.

A smart oven that is made of smart materials. That's the new iQ700 oven. The door of the oven consists of high-quality glass. It is designed to keep the heat inside and to build the beautiful surface of your intelligent oven. The handle is crafted to be invisible to your eyes when you look at it from the front. And to give you a solid grasp, when you need it to put your prepared food inside or take your finished dish out of your oven.

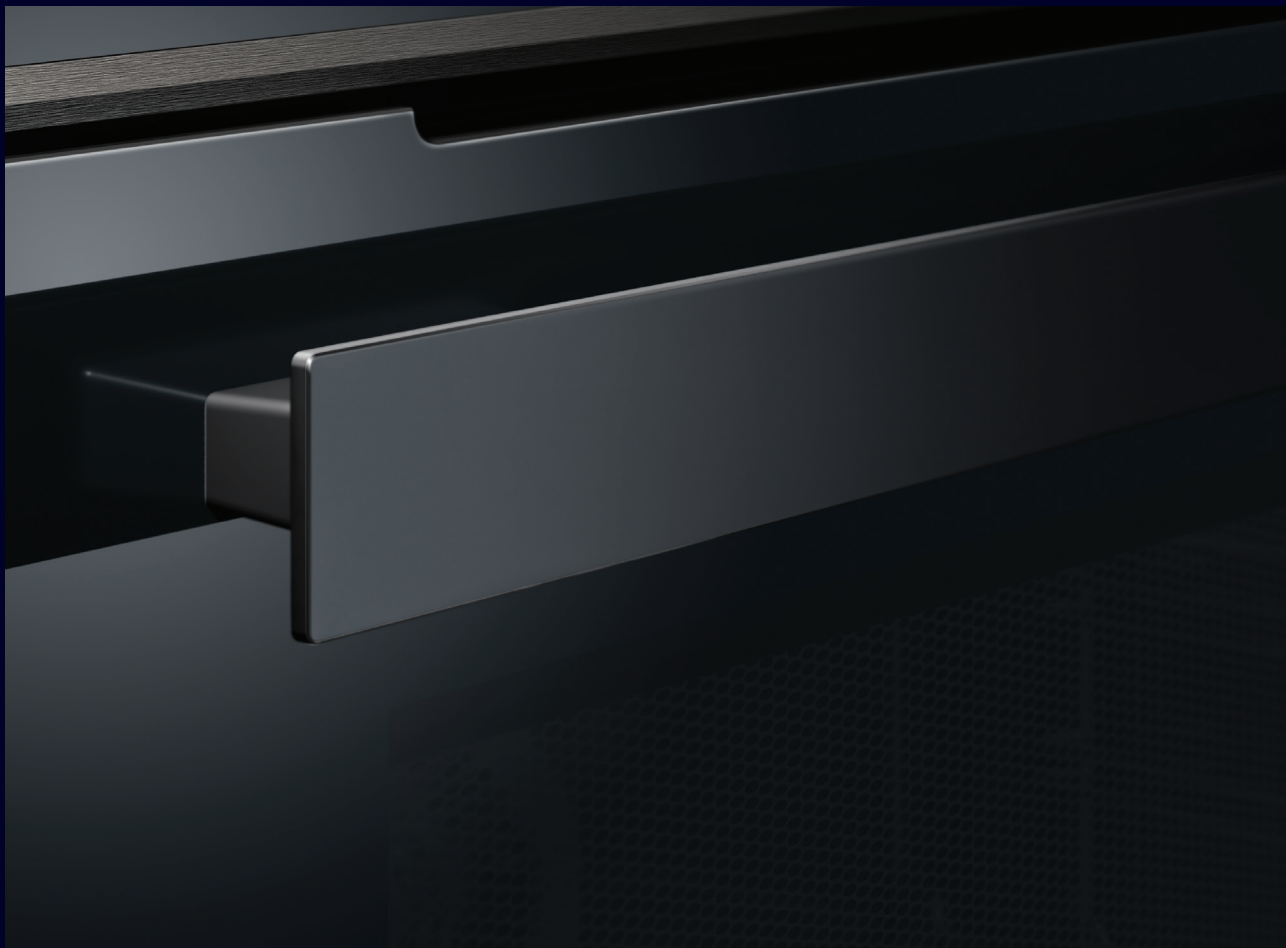

» *A handle that  
seems to disappear.*

Scan the QR code with your smartphone camera. And connect with the stunning design of the new iQ700 oven and its smart features for real.

Outstanding  
design  
that always  
matches  
your taste.

Get in touch with the unique interface of  
the new iQ700 oven and its extensive menu.

**Intuitive by design: The TFT-Touchdisplay.**

The new iQ700 oven's menu comes with a high-resolution TFT-Touchdisplay. The high-contrast colour screen offers you easy to use navigation. Access everything you want and need by a simple touch. Even if you are cooking without a recipe, the menu suggests a whole range of programmed dishes. Everything at a glance. Automatically according to your taste.

**Keep in touch until dinner.**

The touch screen allows you to change the settings of your chosen programme. Your oven informs you about the preheating process which can also be controlled and speeded up at the touch of your finger. Finally, the oven switches off automatically as soon as the programme is completed and your dish is ready to be served. And if it should remain switched off setting the childproof lock is child's play.

# A new user experience: Simply beautiful, beautifully simple.

**It's cooking in high resolution.**

The beautiful contrasts and colours of the display connect the design standards to the high functionality of the oven. With the clear images of all pre-installed dishes, browning levels and instructions cooking becomes even more intuitive and joyful.

# Multiple talents. All aligned in one unique design.

**Combine whatever you require.** The Siemens cavity series redefines your kitchen perception as well as your cooking experience. Choose from a wide range of appliances: Starting with the new iQ700 oven models in different dimensions like the compact oven and combine variable features. Going over to coffee making with the built-

in espresso machine – beautiful and functional at once. And after all, the innovative solutions of the warming drawer and the drawer for vacuuming find their space on the bottom of your built-in combination. Experience how exceptional technology, pioneering built-in solutions and elegant design are tailored

to your kitchen. It makes no difference whether they are alone or combined, side by side or on top of each other – the big picture never fails to impress. Not even down to the smallest detail.

» *What belongs together,  
fits together.*

**Intelligently connected.  
Beautifully combined.**

That is design and function. You decide which function your arrangement should fulfil best. Siemens kitchen appliances meet all the requirements. Cook your dishes to perfection in your smart oven or compact oven – and keep them warm in the warming drawer. Or serve them directly on preheated plates

**Down to the smallest detail.**

Premium materials, like quality glass and steel, stir the senses with their colour and texture. In addition, the TFT-Touchdisplay in all value classes is clean and discreet when turned off. When in use, its design is as clear as the lines of our appliances – and its functions as clear to understand.

**Either way. Your way.**

There are no limits to your creativity when it comes to creating exactly the look you desire. And fulfilling all your needs. Thanks to many technical solutions that Siemens has to offer, the possibilities of arranging your appliances are highly flexible. How about a coffee from your built-in coffee machine while waiting for a perfect meal from your oven?

Every member of a family is blessed with unique qualities. Just like the members of the intelligent Siemens kitchen. Equal in beauty, the intelligent appliances are equipped with the most advanced technology. Because we believe that progress is not only for engineers, but for everyone who wants to live an easy and – of course – delicious life.

**Your oven knows what to do.**

**Just like the rest of your kitchen.**

With the new iQ700 oven there will be no dish that you will find hard to prepare anymore. But the oven is just one member of the Siemens kitchen. Meet the whole range of intelligent appliances and find out how the innovative ventilation system, cooling and dishwashing solutions perform and what they bring to the table.

# Intelligence runs in the family

## **A perfect match.**

inductionAir Plus combines an innovative hob with pioneering ventilation integrated into your cooktop. Its climateControl sensor monitors smells and steam and adjusts the power level automatically. And thanks to flexInduction it always adapts to your needs – and the number and sizes of your pans and pots. While the technology is sophisticated, the clear-lined design is timelessly modern.

## **You know what's in it, even when you're out.**

Not only the new iQ700 oven comes with an integrated camera. Different models of the Siemens fridge-freezers also do: Two integrated cameras allow you to check on your stored items inside the fridge at any time – even at the supermarket. And as if this wasn't enough it automatically updates the inventory list of the food inside while keeping it fresh and tasty.

» *Connect to your kitchen  
from wherever you are.*

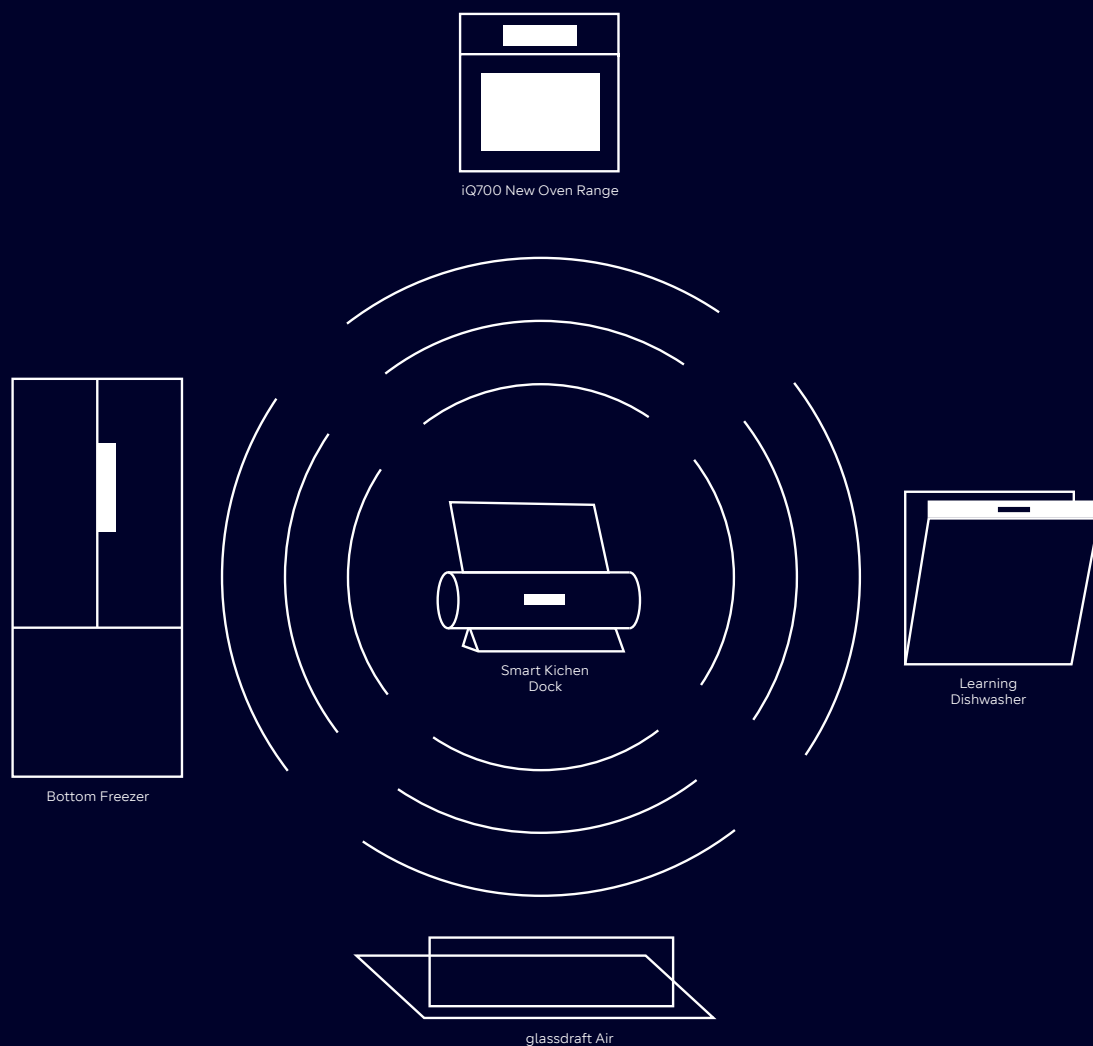

## **A dishwasher that never stops learning.**

Some family members don't like to be criticised, this one even reacts to it thanks to its Intelligent Programme. Rate via the Home Connect App how satisfied you are with the duration of the programme and the cleaning and drying results, and the dishwasher will adjust to it. And while we're being so honest right now, the programme also offers full transparency about water and energy consumption.

# Better together. Connect to endless possibilities.

## The heart of the intelligent Siemens family: The Smart Kitchen Dock.

All your Siemens appliances are wi-fi-enabled, but only one of them builds the heart of your intelligent kitchen: The Siemens Smart Kitchen Dock (SKD). You simply dock your tablet – which is not included in the delivery – to the smart docking station and it will build the bridge between your Home Connect App

and the other Siemens Home Appliances. It makes orchestrating your kitchen even more convenient: Search for preinstalled dishes and recipes and send them to your oven. Flip through your menus via Gesture Control, play music or navigate your oven, dishwasher or fridge via Voice Control. All from one central spot.

### Connect to the full potential of your Intelligent Kitchen.

For preparing the best homemade food you don't have to be a chef. But you will be close to become one, once you have learned how to make best use of all the smart features your intelligent Siemens appliances have to offer. Just like this:

### Well-prepared thanks to Home Connect and foodfitter app.

Imagine your friends are coming over for dinner and you are looking for a new and tasty oven recipe. Nothing is easier than that. You can find plenty of recipes in your Home Connect App. As soon as you have selected your favourite one, your fridge will check the inventory list and automatically update your shopping list.

One of your friends is vegan or has a food allergy? No problem at all: Tell your foodfitter app which ingredients you have and choose one of the suggested recipes. Then you can easily replace single ingredients if needed. Or just wanted.

### Always perfectly in time for dinner.

Finally, your oven sends a notification to your Home Connect App on your smartphone and lets you know that your dish is ready. The oven will be switched off automatically, but in case you want to talk more and eat later, you can just stay with your friends and tell your oven to keep the dish warm until everyone is ready.

### When cooking feels like snapping your fingers.

While you have your hands full with preparing your dish, you can tell your Smart Kitchen Dock to transfer the right settings of your recipe to the new iQ700 oven and it automatically starts preheating. Now that you literally have your hands full with your dish, standing in front of your iQ700 oven, you can simply tell it to open up. While the oven takes over from here, you can focus on the rest. And if your guests don't stick to your timing, you can tell not only your iQ700 oven to speed up but also your dishwasher – still enjoying the best results.

*» Your kitchen takes care of your dinner, so you can take care of your friends.*
